SUMMARY

Software Engineer with **6 years of experience developing backend and full-stack applications** using Python, Django, JavaScript, and PostgreSQL. Skilled in REST API development, database design, and deploying production systems on Linux environments. Built scalable platforms in telecom and web industries that improved operational efficiency and revenue growth. Currently developing modern applications using Django and React while pursuing a Master's in Computer Science.

TECHNICAL SKILLS

Languages & Frameworks: **Python, Django, Node.js**

Web & APIs: **REST APIs, Web Services, API Integration, JSON**

Frontend: **JavaScript, HTML5, CSS3, Bootstrap** (Angular knowledge – foundational)

Databases: **PostgreSQL, MySQL, MongoDB**

Tools & Practices: **Git, Agile/Scrum, SDLC, Code Reviews, Ubuntu, Apache**

Cloud & DevOps: **AWS (Foundational), Linux deployment**

EXPERIENCE

Full-Stack Developer — Self-Employed

Denver, CO | Oct 2025 – Present

- Developing full-stack web applications using **Django, React, and PostgreSQL**
- Building **Urilga**, an event management platform with REST APIs, authentication, and a modern frontend
- Developing a **medical association website** with a doctor directory, an admin dashboard, and payment integration
- Designing database schemas and API endpoints for scalable applications

Software Engineer

Gmobile LLC – Telecom Enterprise | 2017 – 2023

- Developed **self-service kiosk system** using Django and MySQL that increased revenue during COVID
- Built an internal **asset management platform**, reducing operational costs by **95%**
- Developed backend services for **mobile app and e-commerce platform**, increasing profits by **80%** and reducing support calls by **40%**
- Designed APIs and database architecture supporting telecom products and services
